

LASH SHEDDING

- Your natural lashes shed everyday, if you have lash extensions attached to those, they will shed too.
- Makeup, environmental factors and your lash cycle will determine how long the extensions last, which shed first, and retention will vary between infills.

LASH EXTENSIONS AFTERCARE

- Do not get it wet for 24-48 hours after application
- Avoid water pressure from shower
- Keep clean and oil free
- Do not sleep on lashes (you will notice outer corners shedding first)
- Do not apply mascara or false lashes while extensions are on
- Brush gently with clean mascara wand after showering on dry lashes
- Avoid pulling or rubbing lashes
- Use lash extension safe products
- Get regular infills every two weeks
